Forecast for Thursday 07 Nov 2024

Weather: Mostly cloudy and overcast with mist, fog and occasional drizzle. The drizzle most widespread in the morning. Cloud lifting a little during the day before lowering again in the evening. There is a marked temperature inversion due to the dominant high pressure system. This means that some of the highest summits like Pen y Fan could poke above the cloud tops to become cloud free, but details around this are uncertain.

Chance of cloud-free hill tops above 600m: 10%, 30% where summits reach above cloud tops.

Low cloud and visibility: Extensive cloud, base 100-200m rising to 400m in the afternoon before lowering again by the evening, with the cloud tops around the summits of the highest hills. Visibility mostly moderate to very poor, especially in drizzle but very good in any summit clearance.

Forecast for Friday 08 Nov 2024

Weather: Another cloudy and overcast day with mist, fog and occasional drizzle. The drizzle most widespread overnight and early morning. Cloud lifting a little during the day before lowering again in the evening. There is a marked temperature inversion due to the dominant high pressure system. This means that some of the highest summits like Pen y Fan could become cloud free, but details around this are uncertain. Feeling cool on summits.

Maximum wind: Southeast 10 to 15mph gusting 20mph.

Chance of cloud-free hill tops 600m: 10%, 30% where summits reach above cloud tops.

Low cloud and visibility: Extensive cloud, base 100-200m rising to 400m in the afternoon before lowering again by the evening, with the cloud tops around the summits of the highest hills. Visibility mostly moderate to very poor, especially in drizzle but very good in any summit clearance.

Temperature: **Valleys:** Plus 10 Celsius.
At 600m: Plus 3 to 5 Celsius
Freezing level: Above the summits
